

MAGNETIC COUPLINGS

Permanent magnetic couplings are essential for environmentally compatible drive solutions. The use of a magnetic coupling is recommended for applications where the fluid must not come into contact with the external environment, eliminating problems of leakage. In applications with critical, highly toxic or aggressive media, hermetically sealed drives are inevitable. DST permanent magnetic couplings offer a reliable alternative to conventional dynamic seals due to their contactless and leakage-free torque transmission in pumps and agitators.

FEATURES

PERFORMANCE

Standard: 1 – 1,200 Nm

Customer specific: 0.1 – > 10,000 Nm

APPLICATIONS

- Process engineering
- Chemical industry
- Pharmaceutical industry
- Industrial furnaces
- Water management
- Compressors
- Dosing technology
- Hydraulics
- Petrochemistry
- Ship industry

HIGHLIGHTS

- ATEX compliance
- More than 1,000 magnet configurations
- Customer specific solutions
- Contactless torque transmission
- Hermetic separation of the driving and driven side
- Resistant to aggressive media
- Maintenance-free

MATERIALS

Optimally matched to the various media, the wetted parts of the magnetic coupling are made of different materials:

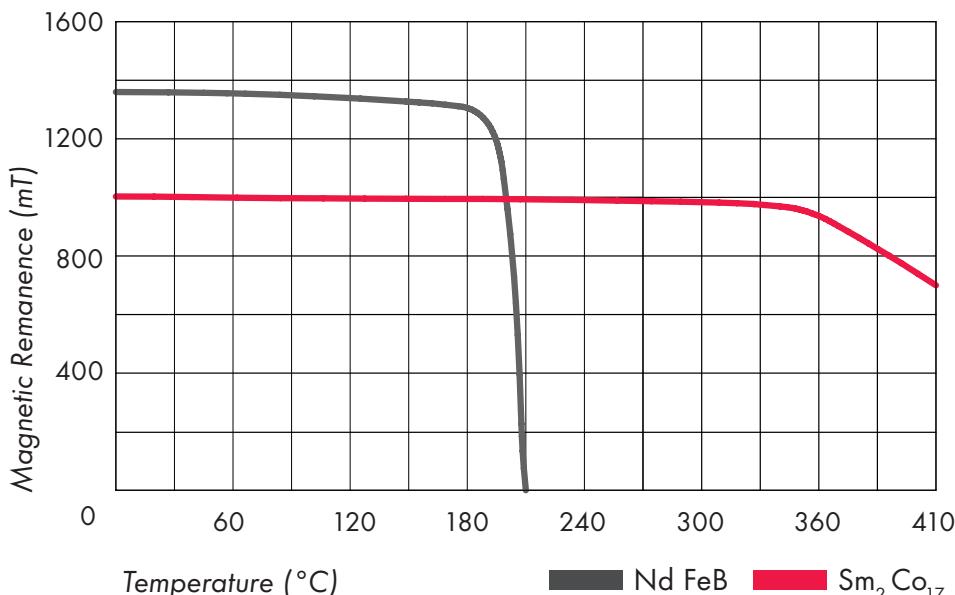

- 1.4301, 1.4401, 1.4404, 1.4435, 1.4462, 1.4539, 1.4980
- 3.7165 Titanium Grade 5, Hastelloy C-4, C-22, C-276
- PTFE, PFA, TFM
