

PA PROCESS PUMP SERIES PA3000

The PA process pump series is a compact, high capacity diaphragm pump for transfer and recovery of a wide variety of fluids. The pump is available in two types - an automated operated and air operated type also with solenoid or air pilot actuation.

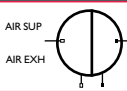

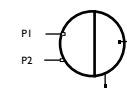

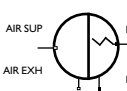

FEATURES & BENEFITS

- Long life, 2 to 5 times that of convetional pumps
- High abrasion resistance and low particle generation
- Self-priming makes priming unnecessary
- No sliding parts in wetted areas
- Incorporates a new diaphragm material
- Enlarged bore size and shortened stroke extend life
